CVE

Produced by cve-bin-tool

Vulnerability Report

Report generated on 09 January 2022 at 13:43:09

1. Introduction

The identification of vulnerabilities has been performed using cve-bin-tool version 3.0

The data used has been obtained from the NVD database which was retrieved on 09 January 2022 at 12:25:49 and contained 167172 entries.

2. Summary of Identified Vulnerabilities

A summary of the vulnerabilities found.

Severity	Count
CRITICAL	0
HIGH	0
MEDIUM	1
LOW	2

3. List of Identified Vulnerabilities

The following vulnerabilities are reported against the identified versions of the libraries.

Vendor	Product	Version	CVE Number	Severity
vendor0	product0	1.0	CVE-1234-1234	MEDIUM
vendor0	product0	1.0	CVE-1234-1234	LOW
vendor0	product0	2.8.6	CVE-1234-1234	LOW
vendor1	product1	3.2.1.0	CVE-1234-1234	unknown
